About This Game

The 58th year of Shouwa, early summer.
It's June, and the summer heat has arrived earlier than it does most years.
By day there are crickets, and by night there are cicadas.

We're in Hinamizawa, a small village in the countryside.
There are fewer than two thousand people here. But every year, there is an event.

This event is a mysterious death.

On a certain day in June, someone dies, and someone else goes missing.
The series of deaths is connected to the upheaval surrounding the dam construction project.
A murder case that was covered up is being reenacted.
Is it a conspiracy? A coincidence? Or perhaps a curse?

Someone who was supposed to be there isn't.
Someone who wasn't supposed to be there is.

Someone who was alive last night is dead now.
And someone who is here right now isn't alive.

So, there is no way to avert tragedy. There is no choice but to give up.
But don't give up.

Only you can stand up to this.

Love the gameboy Asthetic. And where can I get my hands on the snow mountains theme? I want to listen to it without panicking I'll die any second. quite good. shows the creativity of the community. y'all are really good at this. I paid for this back in the day and now it's free to play and still a pile of poo.. This game dont let me refund him.. PLS FIX IT AND MAKE REFUND BUTTON A LITTLE BIT BIGGER BECAUSE I CANT FIND IT.

STOP GET SOME HELP. Mr. Pumpkin Adventure is a very math and programming heavy bizarre Chinese-made point and click adventure with way too many references to everything the creators clearly loved. On one hand, it has a really great strange style, that can remind you a bit of Machinarium, but is, at the same time, distinctly Chinese. It looks and sounds interestingly and it's weird surreal story with little comic book cutscenes between chapters are extremely charming. But then, there are puzzles. Which start as something interesting and fun, but later devolves really heavily into advanced math knowledge, references to movies and things that you might not know and will have to search and committing other "game design sins" of puzzle making.

Which, in the end, really killed the game for me. I went about halfway without even considering to use a walkthrough, but using internet for help, because getting a set number out of a formula of 4 other set numbers is not a task I can solve on my own. But then had to almost exclusively play with the walkthrough in the later parts of the game, apart from some more obvious and not too obscure puzzles. It's charming, it's bizarre, it has all the potential to be amazing, but unless you are into the same things the creator of this game was, I don't think you'll enjoy this journey.. I can't fathom how 93% of people playing have enjoyed this. Upon loading this, it is very easy to see that the developers native language is NOT English. That's fine and all, except for the fact that the whole game is riddled with broken English. "Empty the trash"? Really? You mean "an empty trash can". "Drawer of the tool inside"? I think you meant "there is a tool inside the drawer. Most of the text looks like terrible Google translations copied and pasted into the game.

On to the "horror". I am the BIGGEST wuss when it comes to horror games. THE BIGGEST. So when I say this wasn't eerie or scary at all, I mean it.

Slight Beginning-of-game SPOILER

When I read "Rebecca Diary" (more broken English) and got to the end, a super subtle ghostly image of what I presume to be her appeared, then disappeared. It was so lackluster, it was insulting. Then my hair turned gray and I died. WTF?

SPOILER END

I love pixelated-graphics horror adventures, but this is easily one of the worst. If you want good ones, look more towards The Last Door, Lone Survivor, and hell, even Uncanny Valley blows this away.

Steer clear of this TRASH!

This game is a great concept and is basically a cheap version of Hello Neighbour with its own story, however I would not recommend it in its current state as there are too many bugs and glitches within the game to make it worth while but as I said before is an awesome concept without the bugs and glitches. The game looks nice, and has an interesting idea, especially for a motorsport fan, like I (mostly used to be) am.

There are a lot of different races and each one has a small resemblance with the real F1 track it is named after (country name, of course). I really liked that.

Bad thing is, although there are a lot of different tracks, they all end up looking almost the same... You don't feel like it's a different race, and unless you are an F1 junky, you won't notice the similarities with the real ones, so that is not really that big a plus...

AI is pretty bad... It will do its best to try to fu*k up both his and yours race, but this is definitely not the first game that has such an AI, so can't be mad at them for that.

Interface is not very nice, it feels cluttered, I didn't like it.

And then; there is handling... This is, BY FAR, the worst racing game I've ever played. And I played a lot of different racing games, including the one I made that had such a bad handling that I never wanted to show it to anyone. And this, somehow, beats that.

I cannot even try to begin to explain how bad it feels to "drive" in this game. It is almost worth buying, just to try and see how NOT to make a driving game...

I'm just kidding... Don't buy this game... It's awful.

0/10. Well..... it was 99 cents.... Can this even be described as a product?. Recurring Evil is copy paste quality. The worst version ever.

7hours and finished. No story, no new weapons, bosses so useless.

. will start off by saying that this game has very little to actually "do" in it, it is more of an interactive story almost, but not quite. The object of all three of the Sherlock Holmes Consulting Detective mysteries is to gather clues by deciding on what people and places to visit. Once you have gotten enough information to solve the crime\vs you will go before a judge and he will ask a few questions that you must answer correctly. Getting to the judge and answering questions using the fewest amount of clues that you can will give you a score. The goal is to solve the mystery by using only as many clues as it takes Holmes to solve the mystery. There is not a lot of replay ability in the game except if your score doesn't match Holmes' once you have solve the mystery. I wouldn't expect it to take very many playthorughs to match Holmes scores.

If you like Sherlock Holmes , or some not too hard brain teasers, you will enjoy the game. It is only about 60-90 mins of total gameplay in most instances for each mystery. As for the price, I would definitely go the collection route as it's almost half price. I would probably also wait til it might be on sale as well.
